Boundary Reserve stormwater and wastewater upgrade

Auckland Council's Healthy Waters & Flood Resilience and Parks & Community Facilities departments are upgrading Boundary Reserve to improve stormwater and amenity functions. The upgrade will support urban development and reduce future flood risk by providing the stormwater and wastewater capacity needed for growth, as well as enhancing the reserve for the community to enjoy.

We have now completed phase 1 of the project and will begin phase 2 in late summer 2026.

Completed phase 1 works:

- We upgraded the wastewater pipe in Boundary Reserve and extended it to the new Watercare pumpstation on Dunkirk Road
- We extended the existing stormwater infrastructure from Torino Road to Boundary Reserve

Boundary Reserve – completed works

Phase 2 works to start in late summer 2026:

- We will upgrade the reserve by daylighting 770m of stormwater pipe so that it functions as a natural stream to improve stormwater capacity and restore biodiversity to the area
- We will install a new playground and landscape features
- We will plant the stream banks with native species to prevent erosion.

We will send out more information regarding these works closer to the time.

Other Works

We appreciate that there are other construction works happening in the area. We're coordinating with these agencies as much as possible to minimise disruption to the community.

Contact

If you have any queries about this project, please email us at healthywaters@aucklandcouncil.govt.nz or phone the call centre: 09 301 0101

Visit us at the Tamaki Regeneration Community Day

Torino Reserve, Saturday 6 December

Come down to the Tamaki Regeneration community day and talk to Leighton Gillespie, Auckland Council Healthy Waters and Flood Resilience Project Manager, who will be available to answer questions and share more information about this project.
